SUMMARY

Full-Stack Web Developer with moderate-beginner experience; both a part-time State of Michigan employee and full-time CS student at MSU; participated in club, internship, and personal projects over past couple years.

SKILLS

Skills: TypeScript, Node.js, React, Next.js, Nest.js, GraphQL, C#, Microsoft Blazor, ASP.NET Core

EDUCATION

Michigan State University
Bachelor's, Computer Science

August 2023 - May 2025
GPA: 4

PROFESSIONAL EXPERIENCE

Brass Raven

Co-Owner

Reed City, MI, USA

September 2022 - Present

- Created a robust component library for use with all future Brass Raven applications.
- Contributed to researching and selecting the tech stack for current and future Brass Raven projects.
- Created and picked up weekly tasks.
- Attended and orchestrated weekly meetings for status reports on the company and new task creations.
- Mocked React components for testing using Storybook.
- Tested functions and components using Jest library.

State of Michigan

IT Student Developer

Lansing, MI, USA

August 2022 - Present

- Designed, implemented, and tested software leveraging .NET Core, C#, Microsoft Blazor, and Entity Framework(EF) Core
- Participated in architectural decision making for the team web-application including coding standards, unit testing design, database restructuring, and UI/UX changes
- Encountered a wide variety of growth-inducing learning opportunities from this experience, including being able to teach and present to other core developers on the team.

PROJECTS & OUTSIDE EXPERIENCE

FourPoint

Project Member

East Lansing, MI, USA

January 2024 - Present

- As a software developer at MSU's Imagine Software club, I partake in the continuous implementation of code, design and architecture decision meetings, peer reviews, research, and documentation to both promote best practices and reduce tech debt.

Game-in

Sole Developer

Lansing, MI, USA

August 2021 - August 2022

- The goal of this project was to better utilize my spare time to learn more about JavaScript, HTML, CSS, Node.js & Express.js, and REST APIs through hands-on experience by creating a basic functioning site for storing game lists.
